

The floor flaunts it under the disco lights

A RESIN floor, designed to cope with high impact footfall, is a feature of Urban Inc, a new nightclub situated within the O2 Dome in London. The floor, supplied by **ALTRO**, is claimed to be extremely easy to clean.

Says club manager Sylvain Solignac: 'On weekends we can open until 4am so at the end of a long shift, the last thing we want to do is spend hours cleaning a floor.'

'The floor looks the business and brings the whole club together. It looks very impressive when the lighting is in full swing as it reflects the beams and brings the club to life.'

In addition to AltroScreed Quartz used on the dance floor, AltroCast has been installed in the toilets. The product was chosen to the retro décor fitted in the washrooms.

The flooring contractor was Resintek. Grant Machen of

Resintek says: 'This installation had the real wow factor and has brought everything together at Urban Inc – it looks fantastic.'

AltroScreed Quartz is described as a hard wearing floor suitable for areas where safety features, such as slip resistance are vital. It is also claimed to be resistant to a wide range of chemicals, including many of those found in alcohol.
